Laser Optofluidics in Fighting Multiple Drug Resistance

https://ebooks.benthamscience.com/book/9781681084985/

About the eBook

This monograph is a collection of reviews that presents results obtained from new and somewhat unconventional methods used to fight multiple drug resistance (MDR). Chapters shed light on pendant droplets used for antibiotic drug delivery, the science of lasers and their interactions with fluids in pendant droplets and spectroscopic analyses of droplets used to treat MDR infections.

Contents

- Pendant Droplets - Microfluidic Approach
- Pendant Droplets - Optofluidic Approach
- Profile Analysis Tensiometry for Studies of Liquid Interfacial Dynamics
- Pendant Droplets: Overview of Dynamics and Applications
- Multiple Drug Resistance: An Up-Date
- Laser Beam Properties
- Unresonant Interaction of Laser Beams with Pendant Droplets
- Resonant Interaction of Laser Beams with Pendant Droplets
- Microdroplets of Laser Irradiated Drug Solutions: Surface Tension and Contact Angle
- Interaction of Laser Beams with Medicine Solutions in Bulk
- Lasers in Foams and Emulsions Studies
- Application of Laser Modified Medicines in Fighting Multiple Drug Resistance Acquired by Microorganisms
- Application of Optically Modified Medicines in Fighting Pseudotumours
- Interaction of Medicines Exposed to Laser Beams with Fabrics of Interest for Biomedical Applications
- Microvolumetric Droplets in Air in Hypergravity Conditions
- Lasing by Optically Pumped Pendant Droplets
- Spectroscopy of Microdroplets: An Alternative to the Spectroscopy of Bulky Materials
